PROFILE

Full-stack developer with 1+ year of experience in fintech and billing systems using React, Next.js, Node.js, Express, and MongoDB. Delivered real-time features and REST API integrations in Agile environments. Expanding into NestJS, PostgreSQL, and Docker. Focused on clean architecture and production-ready code.

WORK EXPERIENCE

Junior Software Associate

SNS Ihub

08/2024 – 08/2025

Coimbatore, India

- Built and maintained full-stack applications using React, Node.js, Express.js, and MongoDB, delivering production-ready features across Agile sprints.
- Integrated REST APIs and third-party services, improving data flow and system reliability.
- Collaborated in Scrum ceremonies — sprint planning, standups, and retrospectives — ensuring on-time task delivery.

Software Associate

SNS Ihub

08/2025 – 12/2025

Coimbatore, India

- Developed full-stack features across MERN, Python, and AI-assisted workflows within a microservice-based architecture.
- Integrated third-party UI component libraries and containerized services using Docker for consistent dev/prod environments.
- Explored agentic AI concepts and multi-agent workflow patterns to support automation initiatives.

Software Developer

Pente AI

12/2025 – Present

Coimbatore, India

- Evaluated and integrated open-source tools including Keycloak, Lago, and Meteroid; built across MERN, Next.js, NestJS, and PostgreSQL.
- Designed ERD diagrams, wrote optimized PostgreSQL scripts (migrations, indexing), and managed Docker-based deployments across environments.
- Integrated third-party APIs, prototyped UIs using Lovable, and applied advanced prompt engineering techniques to optimize AI-assisted development workflows.

EDUCATION

BE Computer Science and Engineering

SNS College of Technology

CGPA: 8.75

Coimbatore

TECHNICAL SKILLS

Frameworks/Libraries

React.js, Next.js, Node.js, Express.js, NestJS, Socket.IO, Material-UI, Ant Design, Shadcn/UI

Programming

JavaScript (ES6+), TypeScript, Python

Database

MongoDB, PostgreSQL, Prisma ORM

Tools

Docker, Git, Postman, VS Code, GitHub Copilot, Cursor, Lovable

Other

REST API, Microservices, OAuth, Keycloak, CI/CD, Agile/Scrum, Prompt Engineering

PROJECTS

Accounting Tool

08/2024 – 05/2025

Designed and developed a full-stack accounting solution for SMEs featuring invoicing, quote and bill generation, expense tracking, customer-wise usage monitoring, and financial reporting built using React.js, Node.js, Express.js, and MongoDB.

Hyredragon

08/2025 – 12/2025

Built an AI-powered hiring platform using MERN and Python — analyzes resumes, auto-generates skill-based MCQs, coding challenges, and AI bot interviews. Candidates advance through rounds via threshold scoring; selected candidates receive automated confirmation emails.

Quantum Billing

12/2025 – Present

Built a multi-tenant usage-based billing platform tracking token consumption across organizations, tenants, and users — powered by NestJS, PostgreSQL, Prisma,Temporal.io, and Lago with subscription metering and real-time usage aggregation.

CERTIFICATIONS

- Express.js – LinkedIn (2025)
- MongoDB – Simplilearn (2025)
- Next.js Development – Guvi (IITM Research Park) (2025)
- Agile Foundations – LinkedIn (2025)
